1. Claims 1-11 and 35-38 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record (Fishman or Ono) do not teach polarization mode dispersion controller units and chromatic dispersion units in which a specific frequency component detecting means and a first intensity detecting means are used. The references cited in the paper of 7-27-05 do not teach, nor render obvious, compensation techniques which include both polarization mode dispersion controller and chromatic dispersion units.
